

RAJVEER KHANVILKAR

Cyber Security Enthusiast & Aspiring Web Dev

rajveer.khanvilkarbhosle70@gmail.com | 9955039090 | <http://www.linkedin.com/in/rajveer-khanvilkar> | <https://github.com/rajveerkhanvilkar> | Pune, Maharashtra

PROFESSIONAL SUMMARY

I'm Rajveer Vikram Khanvilkar, a Computer Engineering student at Pimpri Chinchwad College of Engineering & Research. I'm passionate about transforming ideas into scalable technology solutions. My interests span data structures and algorithms, full-stack development, cybersecurity, Android application development, Generative AI, Agentic AI, Large Language Models (LLMs), and Prompt Engineering. I enjoy building secure and intelligent applications that solve real-world problems through software engineering, AI, and automation. I'm constantly learning, experimenting, and improving through projects, system design, and collaborative development. My goal is to create technology that is innovative, meaningful, and reliable.

PROJECTS

- **Apka rakshak - World's First APK Scam Shield | Kotlin, MVVM | APK Malware Detection -Blocks scam APKs before installation**
World's first app protecting user from apk scams Built using Kotlin, Android Security APIs, Static APK Analysis, and AI-based Risk Scoring.
Launched on playstore and successfully gained **4000+ users and 80+ 5 star reviews** | [Playstore Link](#) | Achieved more than 98% Accuracy.
- **ThugNaash – India's First Offline SMS Scam Link Blocker Android Security Application | Kotlin, MVVM, Jetpack Compose**
Developed an offline-first Android security app that detects and strictly blocks scam SMS links in real time using a rule-based detection engine,TRAI DLT verification, and risk-based scoring, ensuring user privacy with no internet dependency | Achieved more than 90% Accuracy.
- **Cyber Security Audit & Vulnerability Scanner – Security & Automation**
Built a security scanner that detects weak headers, exposed ports, outdated SSL, and risky endpoints for web/app vulnerability assessment
- **Smart E-Waste Management System – MERN, Cloud & Gamification**
Built a smart IoT-based e-waste solution with blockchain tracking, secure disposal, and reward-based recycling to support sustainability.
- **Nexus-SOAP Clinical OS – Next.js & Agentic NLP | Achieved more than 90% Accuracy**
Built an ambient AI platform that transforms doctor-patient conversations into structured SOAP notes with multilingual understanding, clinical NLP, React, Human-in-the-Loop validation, hallucination prevention, TypeScript, Gemini 1.5 Flash, and audit-ready PDF generation.
- **Green Corridor for Ambulances – Android , Cloud & Maps API**
An emergency support app optimizing ambulance routes via cloud-powered traffic monitoring and Maps API integration.

ACHIEVEMENTS

- **Holder of 1 Patent and 3 Copyrights related to software/technology innovations.**
- **Selected as a Zonal Level Finalist in the Avishkar Innovation Competition.**
- **Designed, developed, and successfully deployed 15+ applications, demonstrating strong end-to-end development skills.** ([PortFolio Link](#))
- **Secured 1st rank in INNOVATIONXPO 2026 National Level Project Competition out of 450 teams.**
- **Also Won the Best Unique creative innovation Trophy From Skoda | Volkswagen Pvt. Ltd. Pune**
- **Secured 28th rank out of 800 teams at the national-level innovation competition Innovation 2K25.**
- **Received Certificate of Application Approval from Maharashtra Cyber Security Authority for the innovative cybersecurity application "Apka Rakshak".** ([Certificate Link](#))

WORK EXPERIENCE

- **Full Stack Web Development Intern | Future Interns**
Completed a 3-month internship focused on full-stack web development, practical project implementation, and modern software development workflows.

EDUCATION

Sep 2023 - June 2027
BE - Computer Engineering
PIMPRI CHINCHWAD COLLEGE OF ENGINEERING AND RESEARCH
CGPA- 8.62/10
HONOURS- CYBERSECURITY

Class X 2020 - 2021
New millenium eng. med school
SSC- 75%

Class XII 2021 - 2023
New millenium eng. med school
HSC- 69%

PATENT & COPYRIGHT

- **1 Patent**
- **3 Copyrights**

CERTIFICATIONS

- Master Program in Cybersecurity
- Database Programming with SQL
- AWS Academy Graduate - Cloud Foundations
- Maharashtra Cyber Security Authority Approval certificate
- Google Cybersecurity Certificate

TECHNICAL SKILLS

Programming Languages:

Python, Java, SQL, HTML, CSS, JavaScript , TypeScript

Cybersecurity:

Network Security, Android Security, Mobile Application Security, Vulnerability Assessment, Security Auditing, Static APK Analysis, Threat Detection, Risk Assessment, Secure Coding Practices

Full-Stack & Android Development:

React.js, Next.js, Node.js, Spring Boot, Android SDK, Jetpack Compose, MVVM Architecture, REST APIs, Firebase

Generative AI & Agentic AI:

Large Language Models (LLMs), Prompt Engineering, Google Gemini API, Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), AI Workflow Design, AI Agent Development, Context Engineering, Function Calling, Hallucination Mitigation, Human-in-the-Loop (HITL) Validation, Model Evaluation, Chatbot Development, Multi-Step Reasoning, Tool Integration, Autonomous Task Execution

Libraries & Frameworks:

NumPy, Pandas, TensorFlow, SpringBoot, WebDriver, React.js, Node.js

Databases & Cloud:

MongoDB, SQL, AWS Cloud Foundations

Core Computer Science:

Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Computer Networks, Operating Systems

Tools & Platforms:

Git, GitHub, Figma ,Canva
